CONTENTS

Volume 43 Number 1 January 1986

LEADING ARTICLE

Man and Microbe in the 1980s—a challenge? *C. H. N. Bennett* 1

ORIGINAL ARTICLES

Rapid presumptive identification of *Escherichia coli* from urine samples: a simple direct plating method, *C. Henrichsen* 2–8

Diphtheroid-like properties of *Mycoplasma arthritidis*, *C. E. Thirkill and D.S. Gregerson* 9–13

Survival of bacteria in swab transport packs, *R.P. Human and G.A. Jones* 14–18

A blood culture quality control scheme, *A. J. Thorne* 19–23

Identification of pathogenic Neisseria by enzyme profiles determined with chromogenic substrates, *I. A. Wood and H. Young* 24–27

Chemical screening and prediction of bacteriuria—a new approach, *P. A. Lowe* 28–33

Single radial haemolysis for demonstrating measles virus antibody, *M. Fenwick* 34–37

The effect of carbon tetrachloride-induced cirrhosis of the liver on fibrinogen-bound sialic acid and sialytransferase activity in the rat, *J. L. Francis, V. J. Simmonds and A. J. Ingram* 38–43

Improved erythrocyte sedimentation and leucocyte recovery with Dextran T500, *R. M. Antrum and J. S. Solomkin* 44–47

Intrinsic factor antibody detection and quantitation, *D. A. Conn* 48–52

Enumeration of B lymphocytes, *T. Williamson* 53–58

Analysis of lymphocyte sub-populations in cytocentrifuge preparations, *C. D. Gregory, L. P. Shah, H. Lee and P. R. Golding* 59–63

REVIEW ARTICLE

The Legionellaceae, *R. J. Fallon* 64–71

ANNOTATION

Simple immunoassays for salivary and plasma steroids, *J. Dyas, N. J. Cook and D. Riad-Fahmy* 72–83

SHORT COMMUNICATIONS

Spot blood glucose determination: a new method and its application to home monitoring, *G. F. Watts, P. M. West, P. Thaker and K. M. Shaw* 84–85

Control of stirring rate on commercial magnetic stirrers, *J. H. Adams* 86–87

Membrane HLADr (Ia-like) and cytoplasmic chloroacetate esterase expression by blast cells in myeloid leukaemia, *C. S. Scott and H. J. Limbert* 88–90

Isolation of *Trichomonas vaginalis:* a simple diagnostic medium for use in developing countries, *J. Ademayowa Adebayo* 91–92

Improved immunoperoxidase staining on semi-thin sections of epoxy-embedded tissues, *K. Y. Chiu, S. B. Or, W. L. Yau and H. K. Ngai* 93–95

THESIS SUMMARIES 96–99

LETTERS TO THE EDITOR 99–100

STATEMENT OF EDITORIAL POLICY AND FULL INSTRUCTIONS TO AUTHORS 101–105

BOOK REVIEWS 106–112

Volume 43 Number 2 April 1986

LEADING ARTICLE

Controls and standardisation in cellular pathology, *R. T. Allison* 113–114

ORIGINAL ARTICLES

Thionin: further studies and discussion, *Russell T. Allison* 115–120

Effect of melanin bleaching on immunoperoxidase, with reference to ocular tissues and lesions, *R. A. Alexander, P. S. Hiscott, R. L. Hart and I. Grierson* 121–127

The effect of fixation upon monoclonal cryostat immunohistochemistry, *A. Warford and G. S. Ketchin* 128–134

Determination of plasma total alpha-1-antitrypsin by enzyme-linked immunosorbent assay, *R. S. Gemmell* 135–139

Measurement of vitamin B_{12} and serum folic acid: a comparison of methods, *C. R. Gilois, G. Beattie and S. P. Mills* 140–144

Enhanced luminescence: application in a photographically monitored enhanced luminescent enzyme immunoassay for factor VIII related antigen, *H. X. Wang, J. C. Hall, G. H. G. Thorpe, G. G. Nickless, J. George and L. J. Kricka* 145–147

Detection of Type I and Type II antibodies to intrinsic factor, *D. A. Conn* 148–151

Immunogold cell labelling system for T lymphocyte enumeration: an evaluation, *A. D. Blann* 152–156

The anti-bacterial activity of topical anti-infective eye preparations, *K. C. Ashley* 157–162

Factors influencing blood group antigen estimation by immunoautoradiography, *S. C. Gupte, K. Kissling and E. Thiel* 163–168

Influence of tube type on the antiglobulin test, *D. Black and J. Kay* 169–173

The copper sulphate screening test for haemoglobin levels in blood donors: a re-assessment, *A. C. Ugwu, H. L. Reid and A. A. Famodu* 174–176

REVIEW ARTICLE

The Gerbich blood group antigens: a review, *M. E. Reid* 177–182

ANNOTATION

Antibody-dependent cell-mediated cytotoxicity (ADCC) and red cell destruction, *M. A. Greiss* 183–189

SHORT COMMUNICATIONS

Adverse effects of sodium heparin on a radioimmunoassay for plasma cortisol, *P. J. Hughes and J. Dyas* 190–191

Mixing video and micro-computer output signals: applications in microscopy, *J. Elsam* 192–193

Inherent anti-A in mouse ascites fluid, *M-A. Shaw* 194–195

Thermonuclease testing: the rapid identification of *Staphylococcus aureus* in blood culture, *A. Rigby* 196–198

Microplate blood grouping with computer-controlled reading and data interpretation, *G. P. Hedley, R. W. Doughty and A. K. Collins* 199–200

THESIS SUMMARIES 201–202

BOOK REVIEWS 203–208

Volume 43 Number 3 July 1986

LEADING ARTICLE

AIDS and the laboratory, *A. D. Farr* 209–210

ORIGINAL ARTICLES

Demonstration of leprosy bacilli in the eyes of experimentally infected armadillos: a comparison of five melanin bleaching methods, *R. L. Jones and T. J. Ryan* 211–214

Preparation of factor VII-depleted plasma by immunoaffinity chromatography of insolubilised anti-factor VII, *O. Takamiya, S. Funahashi and K. Yoshioka* 215–219

Intrinsic factor antibodies in relation to disease, *D. A. Conn* 220–224

Effects of selected enzymes and monosaccharides in the binding of five bacterial strains to human lymphocytes, *T. Williamson* 225–231

Antimicrobial susceptibility determination by an automated conductance technique, *N. C. Baynes, J. Comrie and I. A. Harper* 232–240

Comparison of five ovine isolates of *Chlamydia psittaci*: an evaluation of three cell culture treatments, *I. E. Anderson* 241–248

A sterility testing method for blood products, *A. Puckett* 249–251

Bacterial contamination of blood for transfusion: a study of the growth characteristics of four implicated organisms, *A. Puckett* 252–257

Rapid analysis of polyamines in cell culture by high performance liquid chromatography, *J. R. Clarke and A. S. Tyms* 258–261

REVIEW ARTICLE

Unusual opportunist mycobacteria, *C. H. Collins, J. M. Grange and M. D. Yates* 262–268

ANNOTATION

Purpose-made enzyme conjugates for quantitative immunoassays, *W. J. Schrenk and K. Kürzinger* 269–276

SHORT COMMUNICATIONS

Automated counting of cells in peritoneal dialysis effluent, *R. Hall* 277–279

Normal monocyte sub-populations defined by monoclonal antibodies and alpha-naphthyl acetate esterase cytochemistry, *H. Inns, I. D. Mackarill, H. J. Limbert and C. S. Scott* 280–283

Routine screening of catheter urine specimens for chlorhexidine resistant organisms, *L. Baillie* 284–285

Identifying Actinomyces, *A. J. G. Proctor* 286–288

Polymerisation of LR Gold resin using white light, *D. S. Nuttall* 289–291

THESIS SUMMARIES 292–293

LETTERS TO THE EDITOR 294–296

BOOK REVIEWS 297–304

Volume 43 Number 4 October 1986

LEADING ARTICLE

Unity and diversity in medical laboratory science, *D. J. Rogers* 305–306

ORIGINAL ARTICLES

Medical laboratory sciences: a look forward, *R. G. Fewell, R. T. Allison, J. Bertrand, D. C. Cowell, A. D. Farr, J. D. Jarvis and D. J. Rogers* 307–313

The influence of substrate and initial cell number on the expression of anchorage independence by two malignant epithelial cell lines, *J. Luker, I. Crane, A. Stone, C. Scully and S. S. Prime* 314–318

Selection and evaluation of laboratory instrumentation in clinical chemistry: I. Survey of major analysers in the United Kingdom, *R. Singer, S. F. Clarke, D. Cowell, D. Kilshaw, J. A. Randell, J. L. Robinson and J. M. White* 319–330

Fluorometric determination of micro-amounts of selenium in human blood, using 2,3-diaminonaphthalene, *Y. Rongpu, H. Jiachen, F. Gongkan and M. Zhengen* 331–334

Measurement of retinol-binding protein in the assessment of renal allograft function, *P. Miller and Z. Varghese* 335–339

Computerised anti-HTLV-III data collection and integration, *S. R. Houston and A. Barr* 340–343

Errors in bacteriological techniques: results from the United Kingdom national external quality assessment scheme for microbiology, *J. J. S. Snell, J. V. De Mello and T. J. Phua* 344–355

Detection of toxoplasma specific IgM by a solid-phase haemadsorption assay, *G. F. Araj and H. Thorburn* 356–359

The manual low-ionic strength polybrene technique for detection of red cell antibodies, *R. Malde, G. Kelsall and R. C. Knight* 360–363

Quality assurance of physiological saline used for blood grouping, *C. Green, G. D. Shirling, J. Kelly and P. L. Yap* 364–368

REVIEW ARTICLE

Lectins in diagnostic histopathology: a review, *R. T. Allison* 369–376

ANNOTATIONS

Quality assurance. I. Philosophy and basic principles, *D. Kilshaw* 377–381

Laboratory management of the haemolytic uraemic syndrome, *R. P. D. Cooke, F. E. Wells and P. E. Rose* 382–385

SHORT COMMUNICATIONS

Gram staining in the rapid diagnosis of small bowel bacterial contamination, *P. Isaacs and B. Jardine* 386–387

Survival of *Legionella pneumophila, J. Barker and D. H. Till* 388–389

Storage of mycobacteria at −20°C, *B. W. Allen* 390–392

Typing of red cells on microplates by the low-ionic polybrene technique, *M. Redman, R. Malde and R. C. Knight* 393–394

THESIS SUMMARIES 395–397

LETTERS TO THE EDITOR 398–399

BOOK REVIEWS 400–409

ERRATUM 409

SUBJECT AND AUTHOR INDEXES 411–418
